Speaking

Every weekend is pretty much the same as the last one. Sue usually sits under the sunshade. Two boys run around a sand castle and their father reads a newspaper. Tom drinks coke at a nearby bar; he does that all day long. Chris and Matt always eat ice cream by the coconut tree and their mom sings along with the radio. A lot of people play volleyball every week at the beach. There is Jim, one of the guards in the park, near the ponds. He catches fish for his own dinner. Fishing is okay because he takes good care of the ponds anyway.

Writing
Mission Word

pretty much

all day

volleyball

sand castle

coconut

pond

Conversation

1. Who sits under the sunshade?
2. What do the two boys do?
3. What does their father do?
4. What does Tom drink?
5. Where do Chris and Matt eat ice cream?
6. Who sings along with the radio?
7. What do a lot of people play at the beach?
8. What does Jim catch for dinner?

Speaking

Turtles have many interesting characteristics. They eat just anything. It depends, of course, on the particular kind of turtle. The snapping turtle is not a pleasant creature. It is a good hunter. It hunts and eats fish, frogs and ducks. The terrapin turtle likes insects, tadpoles, and fish. The box turtle is a sort of connecting link between the land and the water turtles. It spends most of its time on land. It enjoys cooling off in the water when summer arrives. When it is on land, it wanders around. It looks for berries, fungi and other things in the woods.

Writing
Mission Word

characteristic

tadpole

cool off

snap

a sort of

spend

Conversation

1. What do turtles eat?
2. What does the snapping turtle eat?
3. What does the terrapin turtle like to eat?
4. Where does the box turtle spend most of its time?
5. What does the box turtle do in the water?
6. What does the box turtle look for in the woods?
7. Which turtle is a good hunter?
8. What connects land and water turtles?

The gopher turtle digs burrows in dry places for rest during the day. In the early evening they come out and search for their favorite foods which are fruits and vegetables. When their food supplies disappear, the turtles go to sleep during the winter months, like all reptiles that live in temperate climates. The length of their sleep depends on the climate. But many turtles can go without food and sleep away the time from October until March! Turtles that live in the water usually bury themselves on the bottoms of rivers and ponds. Land turtles hide themselves in the ground to spend in winter.

Speaking

Writing
Mission Word

favorite

disappear

sleep away

come out

temperate

bury

Conversation

1. Where does the gopher turtle dig burrows?
2. When do gopher turtles search for food?
3. What are their favorite foods?
4. What do turtles do when food supplies disappear?
5. How long can turtles go without food?
6. Where do water turtles bury themselves?
7. Where do land turtles hide in winter?
8. When do turtles sleep?

Speaking

Animals fight each other. They fight for food and sometimes for their life. They move around and look for food. A lot of people and animals eat plants. The plants do not move nor run away from their enemies. Some plants make poison. With the poison they defend themselves from their enemies. When an animal eats a part of the plant, it gets sick and sometimes it dies. An example of this plant is the Poison Ivy. All parts of it are poisonous and its poison causes rashes all over the body.

Writing
Mission Word

move around

defend

poisonous

enemy

plant

rash

Conversation

1. Why do animals fight?
2. What do animals and people eat?
3. What do plants do to defend themselves?
4. What happens when an animal eats part of a poisonous plant?
5. Give an example of a poisonous plant.
6. What does Poison Ivy cause?
7. Do plants move away from enemies?
8. How do plants defend themselves?

Speaking

Poison Ivy grows throughout much of North America; the Canadian Maritime provinces, Quebec and Ontario, and all U.S. states east of the Rockies except North Dakota, as well as in the mountainous areas of Mexico up to around 1,500 m. The plant is extremely common in suburban and exurban areas of New England, the Mid-Atlantic, and Southeastern United States. Another example is the tomato. Its vine contains poison that causes stomach problems. Animals stay away from these plants.

Writing
Mission Word

throughout

extremely

mountainous

suburban

stomach

Conversation

1. Where does Poison Ivy grow?
2. What areas of the US have Poison Ivy?
3. Where in Mexico does it grow?
4. What areas in the US is Poison Ivy common?
5. What is another example of a poisonous plant?
6. What part of the tomato plant is poisonous?
7. What does the tomato vine poison cause?
8. What do animals do around these plants?

Tiffany always gets up early in the morning. She does not wake up late. She makes breakfast for her husband and children. Then she gets the children ready for school. The children don't wake up easily and sometimes Tiffany shouts at them. They go to school with their father who is a teacher. He does not arrive late for school, and when the children don't hurry, he gets very angry. While her husband teaches at school and her children study, Tiffany stays at home. She does all of the household chores. She washes the dishes, trims the plants, cooks the food and sometimes even walks the dog. She does not waste her time. Instead, she watches cooking shows where she learns a lot of new foods.

Conversation

1. When does Tiffany wake up?
2. What does Tiffany make for her family?
3. Who gets the children ready for school?
4. Do the children wake up easily?
5. Who takes the children to school?
6. What is Tiffany's husband's job?
7. What chores does Tiffany do?
8. What does Tiffany watch to learn new foods?

Speaking

On a fine day when we enjoy walking in a park, we see the clear sky and big clouds. It is going to be a sunny day to walk around and it will be better to have some fun outdoors. But when we look up at the sky and start to see some bigger, heavier and darker clouds, we think it is going to rain and it is better to stay indoors than to play in the rain. At least that is what some of us think. Sometimes we even wonder when the rain is going to stop. We actually miss a point here; the rain will stop because it will eventually. It is better to recall the bigger and darker clouds we see in the sky. Every time we see them, it is going to rain.

Writing
Mission Word

cloud

look up

wonder

outdoor

indoor

miss

Conversation

1. What do we see on a fine day in the park?
2. What kind of day is it for walking?
3. What should we do if we see darker clouds?
4. What do bigger, heavier clouds indicate?
5. What do some people wonder about the rain?
6. What point do we miss about rain?
7. What do bigger and darker clouds mean?
8. When is it better to stay indoors?

Speaking

The rainfall is heavier in places near the ocean than that inland. This is because a larger body of water has a lot to contribute during the early stages of rain formation. Therefore, a rain is not just formed but rather a stronger one which can be called either a storm or a cyclone depending on which hemisphere it was formed. This is a reason why a lot of flooding happens in countries in the tropical regions of the Earth that are surrounded by vast oceans. Usually the coastal areas which are closer to the bodies of water are the ones that receive the heaviest damage when a storm enters a land area.

Writing
Mission Word

rainfall

cyclone

coastal

inland

flooding

coast

Conversation

1. Where is rainfall heavier?
2. What contributes to rain formation?
3. What can strong rains be called?
4. Where does a lot of flooding happen?
5. What areas receive the heaviest damage from storms?
6. Why do coastal areas receive heavy damage?
7. What regions are surrounded by vast oceans?
8. What happens when a storm enters a land area?

Speaking

There is a big difference between a planet and a star. A star appears as a huge ball of hot gases. That gives off heat and light. A planet is much smaller than a star and it shines by reflecting the light. As of 2006 there are 8 major planets and 5 minor planets. Let's begin with the nearest planet to the sun and move outward. The first is Mercury named after the Roman 'Messenger of the Gods.' Mercury's diameter is 2,900 miles, about the width of the Atlantic Ocean. So it's small and is only a fraction of the Earth's size.

Writing
Mission Word

give off

major

fraction

reflect

outward

size

Conversation

1. What is the difference between a planet and a star?
2. How many major and minor planets were there in 2006?
3. What is the name of the planet nearest to the sun?
4. Who is Mercury named after?
5. What is the diameter of Mercury?
6. How wide is the Atlantic Ocean compared to Mercury's diameter?
7. Is Mercury a large planet?
8. How big is Mercury compared to Earth?

Speaking

The planet next to it is Venus. Venus is named after the Roman 'Goddess of Beauty.' It seems nearly the same size as the Earth. It is sometimes called the 'Earth's Twin.' Its diameter is 7,600 miles, while that of the Earth is 7,913 miles. An odd fact about Venus is that it rotates backwards; that is, from east to west. The next planet is our planet, Earth. The Earth is the only planet that can maintain life. It's also called 'The Blue Planet.' Next to it is planet Mars, named after the Roman 'God of War.'

Writing
Mission Word
